

I have Windows 7 and there are no USB drivers for it. I've looked all over the net and can't seem to find a patch or any solution. Currently USB devices cannot be connected to the computer although the USB drivers are installed. How can I fix this issue? Answer. To get a more complete answer, you need to do the following: 1. Turn off your computer. 2. Remove all USB devices from the computer. 3. Remove any external HDD drives (hard drives or solid state drives) (see Chapter 27). 4. Turn on the computer and connect external USB devices to it. 5.
