Endopolygalacturonases (EC 3.2.1.15) are the main pectin-degrading enzymes produced by some bacteria and fungi. To date, endopolygalacturonases have been studied in ascomycetous and basidiomycetous fungi, including members of the genera *Aspergillus*, *Fusarium* and *Penicillium*. *Streptomyces clavuligerus* and *Streptomyces lactacystinaeus* are actinomycetes that grow as filamentous hyphae and produce a variety of secondary metabolites. In this work, the pectate lyases (EC 4.2.2.2) and endopolygalacturonases (EC 3.2.1.15) gene families of these two actinomycetes were identified and characterized. The analysis of the amino acid sequences and the gene clusters showed that the pectate lyase and endopolygalacturonase gene families of *S. clavuligerus* are organized in two different operons. In both species, at least one endopolygalacturonase gene is clustered with genes encoding pectin-methylsterases (EC 3.1.1.11), pectate lyases (EC 4.2.2.2), polygalacturonases (EC 3.2.1.15) and endo- α -1,3-polygalacturonases (EC 3.2.1.67). The endopolygalacturonases of the two species show extensive sequence similarity and identity with other endopolygalacturonases from filamentous ascomycetes. Moreover,

When you draw a line, it automatically flips to landscape or portrait mode based on the plane that intersects the line. (video: 1:08 min.) With Markup Assist, a user interface (UI) panel on the right side of the screen enables you to make changes to the initial text and other annotations on your drawings. There are up to four levels of Markup Assist, and up to four layers of feedback that you can edit. (video: 2:45 min.) Drawing Updates and Markup Annotations: New features allow you to interact with features on a drawing by drawing the appropriate boxes, labels, numbers, arrows, and circles. These annotations can be linked to functions such as markups, markup groups, and annotative geometry. (video: 2:15 min.) In almost every case, objects can be highlighted for editing. You can create and use a style that highlights any annotation, and then apply that style to multiple objects. (video: 2:13 min.) A new high-contrast line weight to fit your preferences can be applied to any line type. (video: 2:08 min.) Notebook text appears to flow around the shape of a diagram as you edit annotations in the notebook. (video: 1:10 min.)
